The diagram illustrates a document translation process involving three main components: a Translation Requesting Device, a Translation Receiving Device, and a Translation Device. The process begins with the Translation Requesting Device sending a "DOCUMENT TRANSLATION REQUEST" to the Translation Receiving Device. The Translation Receiving Device then performs two internal steps: "SPLIT INTO SENTENCES" and "SET TRANSLATION OPTIONS 1". It then sends a "REQUEST SENTENCE 1 TRANSLATION" to the Translation Device. The Translation Device processes this request, performing "PROCESS SENTENCE 1 TRANSLATION", and returns the "RESULTS OF SENTENCE 1 TRANSLATION" to the Translation Receiving Device. The Translation Receiving Device then performs another internal step: "SET UP TRANSLATION OPTIONS 2". It then sends a "REQUEST SENTENCE 2 TRANSLATION" to the Translation Device. The Translation Device processes this request, performing "PROCESS SENTENCE 2 TRANSLATION", and returns the "RESULTS OF SENTENCE 2 TRANSLATION" to the Translation Receiving Device. Finally, the Translation Receiving Device performs an internal step: "INTEGRATE TRANSLATION RESULTS", and then sends the "RETURN TRANSLATION RESULTS TEXT" back to the Translation Requesting Device.
